Work Experience

Inotev Company (Fullstack Developer)

Sept 2024 - March 2025

TeleMedicine Phan Chau Trinh Hospital

Description:

- Built a hospital website system for both patients and doctors, including modules for medical records, prescriptions, and patient-doctor information utilizing AJAX for API calls to hospital systems
- Team members : 10
- Technologies: Java, Spring Boot, JavaScript, jQuery, Ajax, Hibernate, MySQL, Bootstrap

Responsibilities:

- Developed and integrated API services, ensuring seamless communication between frontend and backend
- Maintained the chat functionality, including Chat WebRTC for real-time communication and Socket.IO.
- Collaborated with the Business Analyst team to gather requirements and ensure the solution met business needs
- Collaborated on frontend development with JavaScript and jQuery for interactive user experiences.

June - Sept 2024

Zino Project Management System

Description:

- A corporate internal management system for enterprises, enabling efficient user, task, and work-hour management with role-based access control and real-time monitoring.
- Team members : 8

Responsibilities:

- Maintained system stability and optimized user management.
- Developed a staff management module for tracking tasks, work hours, and productivity.
- Implemented RBAC for secure and flexible role management.
- Performed updates to improve functionality, security, and overall performance

Skills

- Frontend: React.js, React Native, Material-UI, Bootstrap
- Backend: Node.js (Express), Spring Boot, Hibernate
- Database: MySQL, PostgreSQL, MongoDB, Supabase, Cloudinary
- Message Queue: RabbitMQ
- DevOps/Deployment: GitHub Actions, Docker
- Other Tools: Git, Jira, Trello, Postman

Languages: English (Proficient in English communication skills)

Project

Social Network App

March 23 - June 5 2024

Description: An social networking platform, similar to LinkedIn, lets users connect easily, share interesting articles, and join engaging discussions using simple chat features.

Technologies:

- Backend: Node.js (Express), MongoDB, Firebase
- Front-end: React-Native

Responsibilities:

- Created APIs for sending and accepting connection requests, enabling the posting of personal articles using Firebase, viewing profiles, and chatting with partners
- Developed APIs to facilitate messaging between users who have connected through the platform
- Crafted APIs for CRUD posts, allowing users to share multimedia and text, and interact with likes and comments.
- GitHub Repository: <https://github.com/hodinhtuankiet/native-linkedin>

Description: A personal task management Web designed to help you stay organized and focused.

- Backend : Nodejs (Express) , MongoDB
- Frontend: Vite-Reactjs , Material UI

Responsibilities:

- Create API functionalities enable the creation of new columns and cards, facilitating seamless organization and task management
- Using Joi for validation data inputs and error handling in server
- Use dnd-kit library to drag and drop between columns and cards
- GitHub Repository : <https://github.com/hodinhtuankiet/trello-server-express>

Awards

- Future Innovation Award (Viet Future 2024)
- Robocar 2024 Encouragement Prize

Education

- Information Technology and Commucation Viet-Korea University 2022-2026
GPA: 3.42

Extracurricular Activities

- Google Developer Groups On Campus (Backend Developer) January - Now, 2025
As a Backend member at GDSC-DUT, I have enhanced my technical skills by working with modern backend technologies and collaborating with top IT companies like ONE Tech Stop, Paradox, and mgm technology. I also contributed to building backend systems for UniHack, the first student-led Hackathon in Vietnam.
